

Environment and Sustainability Policy

Brisbane City Cycling is committed to ensuring that the impact of our operations is minimised on the environment. We actively seek all opportunities within the business operations to ensure that the emissions footprint of our operations is minimised, recyclable content maximised and local manufacturers used wherever possible.

Management will:

- Effectively managing our significant environmental impacts through our supply chain.
- Minimising our greenhouse gas emissions (Scope 1, 2 and 3) measuring our impact, reporting against it and reviewing environmental performance.
- Striving to ensure that our policies, objectives and achievements are communicated to all persons working for and on behalf of the business and to educate and train employees and ensure competence in environmental issues and the environmental effects of their activities.
- Preventing pollution and harm to the natural, heritage and built environments and to reduce the use of all raw materials, energy and supplies.
- Consulting with relevant stakeholders, taking into account local environmental conditions and working with local communities to achieve shared and lasting outcomes.

Further, Brisbane City Cycling in providing a bicycle tour experience is seeking to promote environmental and sustainable modes of transport to our clientele.
